

Learn to Solder with Mitch Altman and Jimmie Rodgers at LVL1

When:

Saturday, August 14th from 1pm – 5pm

Where:

LVL1 – Louisville's Hackerspace
814 E. Broadway
Louisville, KY 40202

What:

Learn to solder and build electronic gizmos

Who:

Mitch Altman – founder of the hackerspace NoiseBridge in San Francisco, CA and inventor of the TV-B-Gone.

Jimmie Rodgers – a member of the Massachusetts hackerspace Artist's Asylum and inventor of the LOL shield.

LVL1 – Louisville's hackerspace. A shared space for collaborative technical and artistic experimentation in the Louisville area. An open workspace where engineers, artists and educators can meet and collaborate. LVL1 is where we begin making amazing things!

Come by anytime between 1pm and 5pm to learn a useful and fun skill. Several kits will be available in the \$15-\$30 range and all tools are provided for your building pleasure. This class is appropriate for all ages. Bring your kids with you and introduce them to the wonderful world of electronics.
